Instruction

- You need to use a frame with 250 pins evenly spaced around the circle.
- You can download a template for making a frame yourself at https://s-art.pro/docs/250_pins_Template.pdf
- The appearance of the picture is highly dependent on the size of the frame and the thickness of the thread!
- The thread should be thin - for a 600 mm (~ 24 in) frame, the thread thickness should be approximately 0.1-0.12 mm
- For more details, see https://s-art.pro/docs/Product_description.pdf

"Poyekhali!" ("Off we go!")
